

Invented for life

BOSCH

Everything for the diesel service

Diagnosis, Testing and Repair Tools

04 Diesel service from Bosch

Bosch offers a comprehensive range of professional diagnostics and repair solutions for modern and conventional diesel systems.

06 Diagnosis on the vehicle

Bosch has a wide range of tools for easy and quick diagnosis of diesel components.

08 Repair tools on the vehicle

In addition to expert service, Bosch offers high-quality tools for a more efficient component repair on the vehicle.

10 Test equipment for components

Bosch boasts a comprehensive range of modern and user-friendly technologies for professional testing of removed diesel components.

	Common-rail		Conventional systems
12	DCI 700 Common-rail injector test bench	23	EPS 625
		26	EPS 100
16	DCI 200 Single common-rail injector test bench		Accessories
		28	EPS 815
20	EPS 708 Common-rail pump test bench		

30 Repair tools for components

In addition to expert service, Bosch offers high-quality tools for a professional repair of individual components.

Diesel service from Bosch: **precise, professional and fast**

Many years of experience in diesel technology, workshop equipment and testing technology make Bosch one of the leading suppliers in this field worldwide.

Innovations in development and production have resulted in modern high-pressure systems in recent years. Bosch is pursuing a holistic approach to mobility: solutions are developed for the vehicle and beyond. With the expertise from original equipment, innovative test equipment including the corresponding software is developed in parallel.

Bosch supports workshops holistically – from straight-forward troubleshooting and efficient component testing to the repair of diesel components and systems based on their current value.

Efficient and flexible component testing and repair

Thanks to Bosch testing solutions and numerous retrofit sets, component testing and repair can be carried out according to manufacturer specifications. This ensures that

**accurate and reproducible
measured values**
are determined

a **warranty assessment**
is possible **according to the
manufacturer's specifications**

a contribution is made
**to compliance with
emission standards**

Diagnosis on the vehicle

Diesel sets

Diesel set 1

For low-pressure circuit testing
 0 986 613 100

Diesel set 2

For low-pressure system venting
 0 986 610 234

Measuring equipment and accessories

Backflow meter

For determining the fuel return flow rate on CR injectors
 0 986 612 950

Connection adapter set For Bosch CRI2-18, 2-20 90° angle

 0 986 613 696

Connection adapter set For Bosch CRI2-18, -20 Straight

 0 986 613 926

Denoxtronic

Denoxtronic 2 test set

For checking metering and delivery rate with Denoxtronic 2.x
 0 986 610 450

Denoxtronic PC/LD test set

For exhaust gas aftertreatment with Denoxtronic 3.1 and Denoxtronic 5.x
 0 986 613 900

Upgrade kit from Denoxtronic 3.1 to 5.x

upgrade set for Denoxtronic case (0 986 610 500)
 0 986 610 930

Substitute load boxes

CRI substitute load box

For testing the control signal at solenoid valve CR injectors (passenger cars only)
 0 986 612 745

HFM-7 test cable

Hot film air flow meter 4-pin
 1 684 463 835

PSG-5 test box

For testing the PSG5 input as well as CAN-L and CAN-H signals
 0 986 612 447

Other accessories

Diesel sets	Description	Order number
Pressure gauge	Special gel-damped pressure gauge for measuring the pressure of the supply pump during operation at the vehicle, recommended for UI systems	1 687 231 906
Extension set of diesel set 3 and diesel set 3.1	Extension of existing diesel set 3 or diesel set 3.1 for checking the RDS function (operating range) while the engine is running	0 986 613 925
Upgrade set from diesel set 3 to diesel set 3.1	Upgrade for existing diesel set 3 to 3.1 to enable testing engines with CP4.1 and CP4.2	0 986 614 310
Substitute load boxes	Description	Order number
CRI/CRIN substitute load box	Test device for the control signal at piezo common-rail injectors (passenger cars only): a substitute load is used rather than an installed injector to test the control signal	0 986 612 793
CRI piezo substitute load box	Test device for the control signal at piezo common-rail injectors (passenger cars only): a substitute load is used rather than an installed injector to test the control signal	0 986 610 099

Measuring equipment and accessories	Description	Order number
Sealing parts set	Closure part-set: For return lines pipes made of hard plastic to close these pipes (1 set = 6 pcs) for back flow measuring device 0 986 612 950	0 986 612 900
Connection adapter set for Delphi CR injectors	Hydraulic return connection at Delphi injectors for testing the return flow rate with return flow rate measuring device 0 986 612 950 (1 set = 6 units)	0 986 613 902
Connection adapter set for Siemens, VDO CR injectors	Hydraulic return connection at Siemens, VDO injectors for testing the return flow rate with return flow rate measuring device 0 986 612 950 (1 set = 6 units)	0 986 613 906
Connection adapter set for Bosch piezo CR injectors	Hydraulic return connection with return holding valve at Bosch piezo injectors for testing the return flow rate with return flow measuring device 0 986 612 950 (1 set = 6 units)	0 986 613 922
Connection adapter set for Denso CR injectors	Hydraulic return connection at Denso injectors for testing the return flow rate with return flow rate measuring device 0 986 612 950 (1 set = 6 units)	0 986 613 923
Connection adapter for Delphi CR injectors 45° angle	Hydraulic return connection at 45° angle at Delphi injectors for testing the return flow rate with 0 986 612 950 (1 adapter = 1 unit)	0 986 610 976
Connection adapter for Delphi CR injectors 90° angle	Hydraulic return connection at 90° angle at Delphi injectors for testing the return flow rate with 0 986 612 950 (1 adapter = 1 unit)	0 986 610 979
Connection adapter for Siemens, VDO CR injectors	Hydraulic return connection on Siemens, VDO injectors for testing the return flow rate with return flow rate measuring device 0 986 612 950 (1 adapter = 1 unit)	0 986 610 908

Test cable	Description	Order number
HFM5	Test cable with 5V voltage stabiliser chip for testing the HFM5 (hot film air flow meter) in the dismantled state	0 986 610 129
HFM6	Test cable for testing the HFM6 (hot film air flow meter, 4-pin) at the vehicle	0 986 610 067
HFM6	Test cable for testing the HFM6 (hot film air flow meter, 4-pin) at the vehicle	0 986 610 195
HFM6	Test cable for testing the HFM6 (hot film air flow meter, 5-pin) at the vehicle	0 986 610 196
HFM6	Test cable for testing the HFM6 (hot film air flow meter, 5-pin) at the vehicle	0 986 610 441
HFM6	Test cable for testing the HFM6 (hot film air flow meter, 5-pin) at the vehicle	0 986 610 651
HFM7	Test cable for testing the HFM7 (hot film air flow meter, 4-pin) in Fiat Group, Ford and Suzuki vehicles	1 684 463 738
HFM7	Test cable for testing the HFM7 (hot film air flow meter, 8-pin) in GM Group vehicles	1 684 463 836

Denoxtronic	Description	Order number
Denoxtronic 2.2	A special metering module must be used to be able to assess the delivery capacity of the Denoxtronic 2.2 delivery module	0 986 610 522

Other accessories	Description	Order number
Measuring sensor KDEP 1880	M10x1 measuring sensor, 48 mm long, for precise pump/motor allocation. Enables the pre-stroke or K1-FB measuring point at distributor pumps (VE.E, VE.F)	0 986 612 480

Denoxtronic 3.1 tool set

for removing the heating chamber from the tank

0 986 610 680

Workshop tip

Testing technology and service kits

Diagnosis is carried out with a KTS device and Denoxtronic tool set (see Fig.): this determines which modules are faulty and need to be replaced.

Cleaning tools	Description	Order number
7.2 mm sealing cone	Sealing cone with a diameter of 7.2 mm. Used to close the nozzle/injector bore when cleaning the surface/face (6 sealing cones and 1 retaining rod)	0 986 612 917
9.2 mm sealing cone	Sealing cone with a diameter of 9.2 mm. Used to close the nozzle/injector bore when cleaning the surface/face (6 sealing cones and 1 retaining rod)	0 986 612 909
CRI/CRIN cleaning brush	This special wire brush must be used for cleaning the CR injector installation hole. It is also suitable for UI as well as for nozzles. Sealing cones 0 986 612 917 or 0 986 612 909 must be used to close the nozzle opening	0 986 612 729
Puller and extractor tools	Description	Order number
CRI turning device	For CR injectors with HP connection on the side: the injector is loosened by twisting it slightly to make it easier to remove	0 986 611 481
Support wench	Retaining tool for disassembly/assembly of the drive coupling on the CP2 pump	0 986 612 857
Puller	Removal tool for disassembly of the drive coupling on the CP2 pump	0 986 612 859
Puller	UI extractor from VW Group 1.9l with UIS/PDE diesel engines	0 986 612 750
Mounting sleeves	Description	Order number
O-ring mounting sleeve	Tool for mounting the CR pressure control valve O-ring without damaging the DRV	0 986 612 787
O-ring mounting sleeve set	Mounting sleeves for mounting the O-rings on unit injectors (passenger cars) of 1st generation VW Group vehicles (1 set = 3 units)	0 986 613 824
O-ring mounting sleeve set	Mounting sleeves for mounting the O-rings on unit injectors (passenger cars) of 2nd generation VW Group vehicles (1 set = 2 units)	0 986 611 490
O-ring mounting mandrel	Tool for damage-free assembly of the return O-ring at the CR piezo injector	0 986 614 030
Measuring devices	Description	Order number
Start of delivery measuring device	Measuring device for FB adjustment with VP44 (BMW and MAN), included in VPM 844 1 687 00x 844, but not included in 0 986 614 130	1 688 130 237
Delta-phi measuring device	Measuring device for delta-phi with VP29/30 (Opel, Ford), included in VPM 1 687 001 844, but not included in 0 986 614 131	1 688 130 239
Delta-phi measuring device	M10x1 measuring sensor, 48 mm long, for precise pump/engine allocation to enable the pre-stroke or K1-FB measuring point at distributor pumps (VE.E, VE.F)	0 986 612 480

DCI 700

DCI 700	400 V, 3 PH, 50/60 Hz	0 683 725 001
DCI 700	200 V, 3 PH, 50/60 Hz	0 683 725 002

Precision and speed

Current emission standards as well as future directives make the accurate testing of common-rail injectors in modern diesel engines increasingly more important. The DCI 700 test bench has advantages for the workshop. Companies benefit equally from the short assembly and testing times as well as its user-friendly operation.

Benefits

- Time saving and high throughput thanks to clamping and unclamping of 4 standard injectors in only 5 minutes and an average test time of 15 minutes
- Testing of all diesel injectors for passenger cars and commercial vehicles - Bosch and third-party manufacturers
- VCC and NCC technologies testable according to manufacturer specifications
- High coverage rate of more than 95% of CRI and CRIN injectors
- First-class quality, reliability and transparency thanks to fast and precise testing including IMA/NIMA coding
- High effectiveness thanks to ergonomic workflows and intuitive operating concept
- Software updates and test schedules can be downloaded quickly and conveniently online
- Low maintenance costs because there is no longer a need for sensitive high-pressure hoses

Facility concept

DCI 700

Ideal workbench for diesel service (0 986 613 300)

The workplace for repairing diesel injectors and components must meet very high standards of cleanliness, functionality and straight-forward design. Otherwise, even the smallest dirt particles in diesel systems can lead to malfunctions.

Recommended facility properties:

- Sealed concrete floor
- Sufficient ventilation by means of an exhaust air system to remove vapours
- Sound insulation is recommended

Common-rail pump test bench

EPS 708

EPS 708	400 V, 3 PH, 50/60 Hz with cooling system	0 683 708 020
EPS 708	200–240 V, 3 PH, 50/60 Hz with cooling system	0 683 708 021
EPS 708	400 V, 3 PH, 50/60 Hz without cooling system	0 683 708 001
EPS 708	200–240 V, 3 PH, 50/60 Hz without cooling system	0 683 708 002

Powerful

The EPS 708 diesel test bench made by Bosch specifically for common-rail injection pumps allows testing up to 2 200 bar.

Benefits

- Measure electronic flow for efficient common-rail component testing
- Electronic inlet pressure control for pump and lubricating oil supply
- Simple pump assembly without coupling cover
- Integrated cooling system reduces water consumption in the workshop (water cooling optionally available)
- Electronic monitoring and display of service intervals (e.g. test oil change)
- Self-diagnosis system indicates necessary filter change

Did you know?

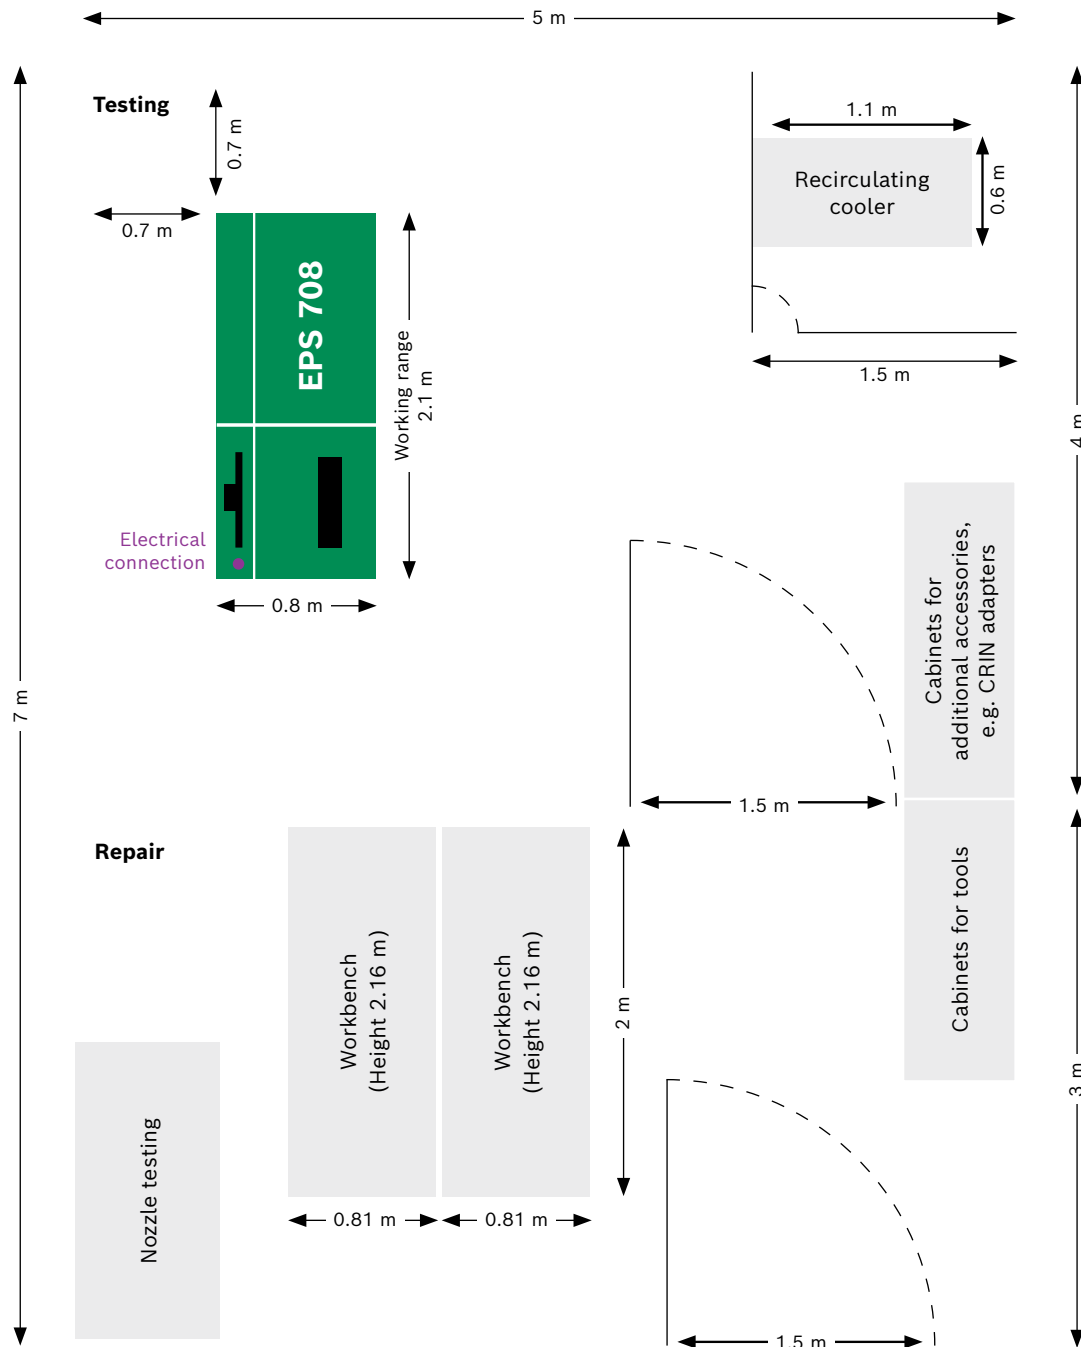

220 million

common-rail pumps have been
produced by Bosch since 1997

Facility concept

EPS 708

Ideal workbench for diesel service (0 986 613 300)

The workplace for repairing diesel common-rail pumps must meet very high standards of cleanliness, functionality and straight-forward design. Otherwise, even the smallest dirt particles in diesel systems can lead to malfunctions.

Recommended facility properties:

- Sealed concrete floor
- Sufficient ventilation by means of an exhaust air system to remove vapours
- Sound insulation is recommended
- A water connection with inlet and outlet or recirculating cooler

Conventional test bench

EPS 625

EPS 625 no longer available.

Accessories still available while stocks last.

EPS 625 HMI version

EPS 625 415 V, 3 PH  F 002 DG0 921

EPS 625 220 V, 3 PH  F 002 DG0 922

EPS 625 PC version

EPS 625 415 V, 3 PH  F 002 DG0 923

EPS 625 220 V, 3 PH  F 002 DG0 924

Injection pump test bench

The EPS 625 component test bench can be used to test powerful conventional in-line and distributor injection pumps from both Bosch and other manufacturers. The specifications of the engine and vehicle manufacturers are adhered to. The robust and easy-to-use technology makes the EPS 625 a cost-effective and long-lasting investment for the workshop.

Benefits

- Maintenance-free drive with high efficiency
- Long service life of the high-pressure lines, as the measuring device can be adjusted in three levels
- Excellent concentricity and speed stability ensure high repeat accuracy
- Large flywheel mass
- Speed control with extremely short speed control time
- Integrated boost pressure control unit
- Automatic test oil heating, adjustable via supply or return flow
- Easy operation thanks to high-resolution 5.7" LCD display for displaying set/actual values, drive speed, set and actual stroke, test oil tank temperature, supply and return temperature

Accessories

EPS 625

Basic set

For H/R/A/M/MW/P/VE-pumps

📦 1 687 005 018

A pump set¹

For testing and adjusting A-pumps
made by Bosch

📦 1 687 005 019

M and MW pump set¹

For testing and adjusting PES M and
PE(S) MW pumps made by Bosch

📦 1 687 005 020

P pump set¹

For testing and adjusting
P-pumps made by Bosch

📦 1 687 005 021

VE pump set

For testing and adjusting
VE-pumps made by Bosch

📦 1 687 005 022

H/R pump set¹

For testing and adjusting H-pumps
and R-pumps with Electronic Diesel
Control (EDC)

📦 1 687 005 023

¹ Additionally requires specific accessories that are not included in the basic set.

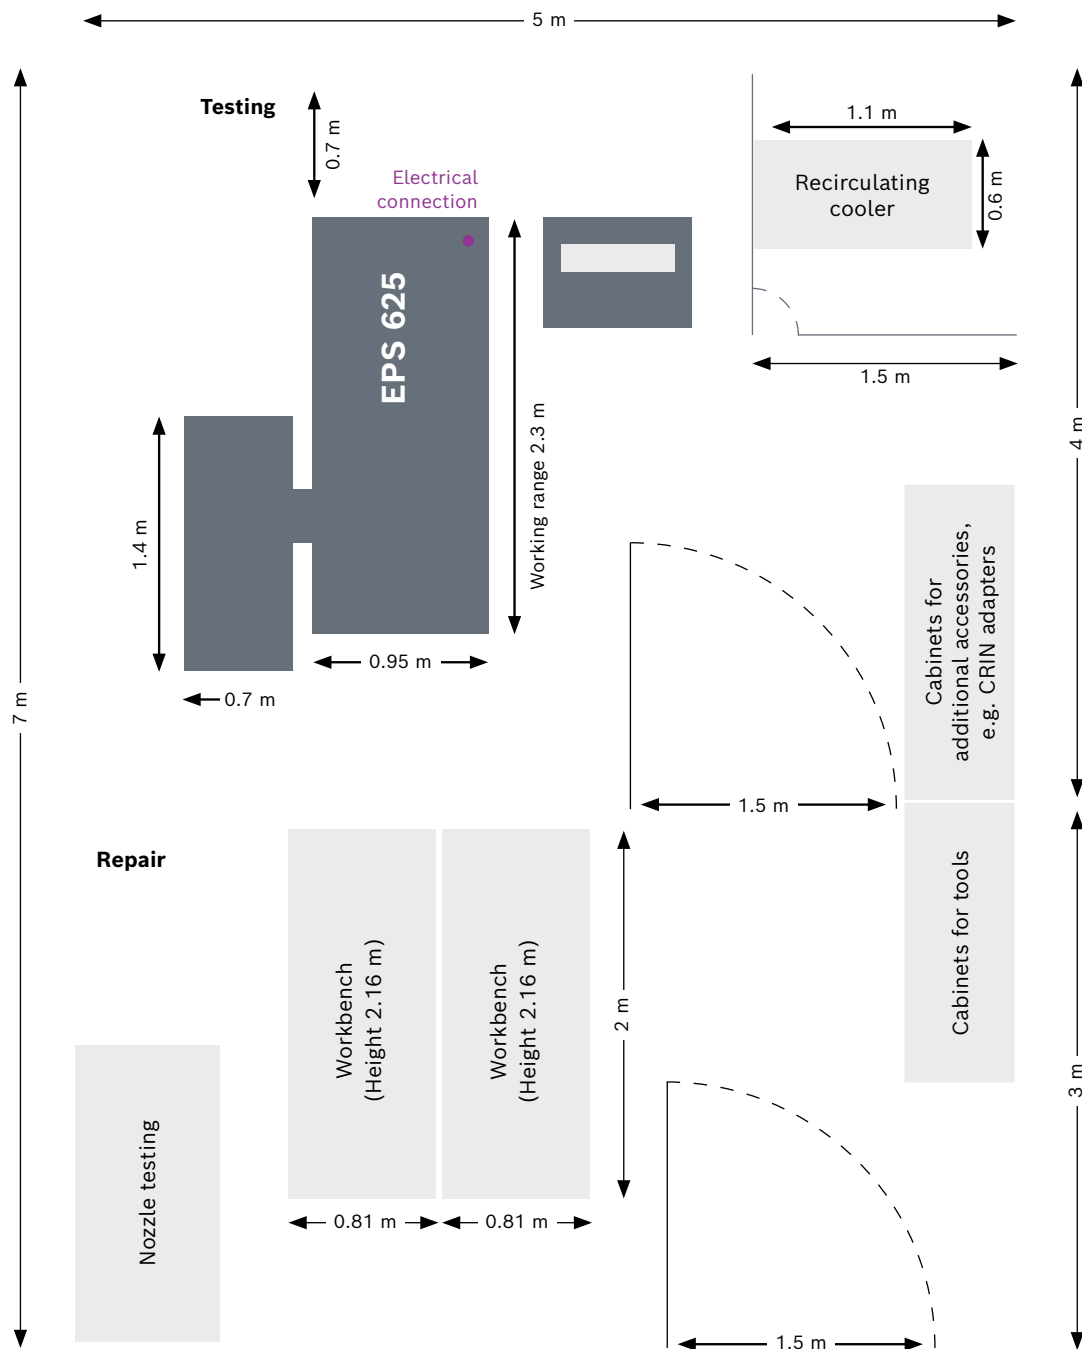

Did you know?

60 million in-line injection
pumps and

75 million distributor
injection pumps have been produced
by Bosch since 1997

Facility concept

EPS 625

Ideal workbench for diesel service (0 986 613 300)

The workplace for repairing conventional injection pumps must meet very high standards of cleanliness, functionality and straight-forward design. Otherwise, even the smallest dirt particles in diesel systems can lead to malfunctions.

Recommended facility properties:

- Sealed concrete floor with damping at the test bench base
- Sufficient ventilation by means of an exhaust air system to remove vapours
- Sound insulation is recommended
- A water connection with inlet and outlet or recirculating cooler

Injection nozzle testing device

EPS 100

EPS 100  0 684 200 704

For efficient and flexible work

The EPS 100 facilitates the reading of the opening pressure of injection nozzles.

Benefits

- Testing and adjusting the opening pressure of injection nozzles
- Assessment of the emerging jet with regard to shape and atomisation (spray pattern)
- Checking the tightness of the nozzles and the snaring properties for 2-spring nozzle holder, step holder and UI/UP applications
- Reduced total error (+/- 2.4 bar) due to high reading (1 bar) and pressure gauge accuracy
- Engine idle shaking can be avoided through the most precise analysis of the smallest leaks
- Direct extraction of oil mist when testing injection nozzles (only possible in conjunction with EPS 738)

Accessories

EPS 100

For testing the suction device	Order number

What drives you, **drives us**

Bosch technologies are used in most vehicles worldwide.
People, and assuring their mobility, is what we are focused on.

Therefore, we have dedicated over 130 years of pioneering spirit
and expertise in research and manufacturing to achieving this.

We provide the aftermarket and workshops worldwide with modern diagnostic and workshop
equipment and a wide range of spare parts for passenger cars and commercial vehicles:

- solutions for efficient vehicle repairs
- innovative workshop equipment and software
- one of the world's most comprehensive ranges of new and exchange parts
- large network of wholesale customers, for quick and reliable parts supply
- competent hotline support
- comprehensive educational and training offers
- targeted sales and marketing support
